

Martins Animasaun, Software Developer

martinsjyx90s50@gmail.com

DETAILS

0401636525

PROFILE

I have Bachelor's degree in IT and engineering from the University Of Applied Sciences, Åland, Finland and real world experience in building software with Java, JavaScript, VueJs, AngularJs and relational database (e.g PostgreSQL), I have practical knowledge in C++, C and No-SQL databases (e.g Apache Cassandra and MongoDB). As a developer at PAF I've had the opportunity to partake in variety of back-end and front-end projects, designing, building, debugging, testing, fixing bugs, upgrading legacy application EJB (Enterprise JavaBeans) deployed on weblogic, participate in different conferences including advanced course in OWASP security training, etc.

I constantly work on a personal project. For the project that I'm working on now I use SpringMVC, Netflix Eureka and Zuul for application gateway and service discovery, Jwt token for security and authentication, MySQL database and Heroku (PaaS).

EMPLOYMENT HISTORY

Software developer, PAF

Aug 2018 — Present, Mariehamn, Åland Finland.

The employees duties will primarily revolve around building software by writing code, as well as modifying software to fix errors, adapt it to new hardware, improve its performance, or upgrade interfaces. The employee will also be involved in directing system testing and validation procedures, and also working with customers or departments on technical issues including software system design and maintenance.

To be successful in this role, the employee will need extensive knowledge of programming languages and the software development life-cycle. A Bachelor's degree in computer science or related degree is required.

EDUCATION

Teknologi institutit, Telecommunication Project Planner

Sep 2014 — Jun 2014, Gutheburg

University Of Applied Science, Information Technology and Engineering

Aug 2015 — Jun 2018, Mariehamn

COURSES

Big Data, Larning Tree International

Jul 2017 — Jul 2017

Software Development Quality Assurance, Latvia - Conference

May 2019 — May 2019

SKILLS

Java Programming

EXTRA-CURRICULAR ACTIVITIES

Website development, Self

Jan 2018 — Present,

Building a website with Spring boot and JavaScript: The idea is to have a website that serves as bookmark for URLs.

- Users can share public URLs with friends.
- A URL can be recommended to a user through back-office tool.
- Users can do almost anything with a URL

Clicking on a URL will open a new tab which will take user to that URL's page once done the user can close the tab and he/she will be back on the site.

The first phase of the website is completed, so a user can login and register. However, I haven't had time to put it in the cloud. This will be the next phase of the project.

PostgreSQL

Heroku

HOBBIES

Gym, traveling and reading a lot.
